

City of Boca Raton Police Department Headquarters Project

BACKGROUND

Boca Raton's Police Department Headquarters was built nearly 40 years ago to serve a much smaller community. Since then, the City has expanded westward, grown in population, and become a hub for students, businesses, and visitors, shifting the population center and increasing service demands.

The current headquarters located at 100 NW Boca Raton Blvd, is not hurricane-rated, does not currently provide enough space for all staff and equipment, has limited space for future expansion, and is not built to current standards.

In 2007, a space needs study was conducted that identified options for an improved and expanded headquarters to meet the City's projected future public safety needs, prompting the project to be added into the City's Capital Improvement Program.

PROPOSED PROJECT

A new headquarters is being proposed at a site on Spanish River Blvd near I-95. If approved, this project will:

- Be designed to address public safety service demands for the next 30 years.
- Provide a centralized location for police officers and the public as well as access to all areas of the City.
- Be built to current standards including hurricane/storm resiliency.
- Consolidate services currently operating in separate locations.

The new location is not expected to impact emergency response times anywhere in the City.

BALLOT QUESTION

Boca Raton Police Department Headquarters and Public Safety Facilities Project

On the **March 10, 2026, ballot**, City voters will be asked the following ballot question:

Shall the City issue general obligation bonds, in one or more series, to finance the construction and equipping of a new police department headquarters, and related public safety support facilities located within the City in the principal amount not to exceed \$175,000,000, bearing interest at not exceeding the legal rate, maturing not later than 30 years from the date of issuance, and payable from ad valorem taxes levied on all taxable property in the City?

- _____ FOR BONDS
- _____ AGAINST BONDS

The outcome of the referendum will determine whether the project moves forward.

FINANCING

Proposed bond amount not to exceed \$175 million (General Obligation Bond): A government financing method repaid through property taxes over time by current and future taxpayers and residents.

Projected average property tax impact from proposed bond:
0.2605 mills, about \$123.74 per year.

If this bond is approved, the City's property tax rate is projected to remain lower than comparable cities.

The project will not inhibit the multi-use path around Blue Lake.

Renderings of the proposed facility based on current conceptual project design.
